AR Balls - AR Coated Ball Lenses

Anti-Reflection (AR) coatings are a type of optical coating applied to the surface of the ball and other optical devices to reduce reflection. This improves the efficiency of the system since less light is lost.

Typical Applications: Laser Collimating and Focusing, Laser-to-Fiber Coupling, Fiber-to-Fiber Coupling, Fiber-to-Detector Coupling

Model	Diameter (Mm)	Grade	Material	Wavelength (Nm)
B2.00S-AR1550	2.00	10	Sapphire	1550
BK7-2.00-AR800	2.00	10	BK-7	800-1100

NOT SEEING EXACTLY WHAT YOU NEED?

We specialize in creating a wide range of custom optical components and custom mechanical components including a variety of shapes - from internal holes and tapers to outer flanges, angles and surface finishes. Contact us (800-922-0118) and we will consult with you to create a custom component that meets all of your specifications.
