Fused Silica Balls - FSB 1.50

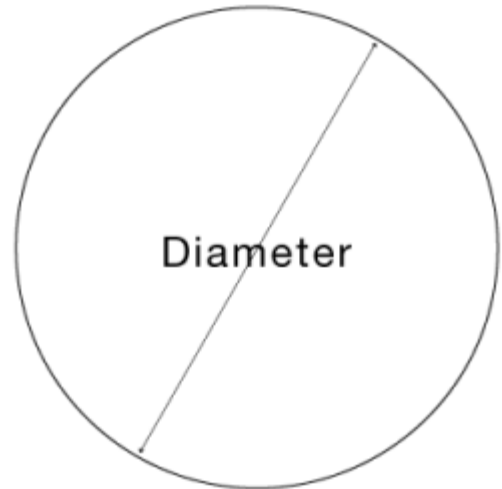

Specifications

Model	FSB 1.50
Diameter	0.059
Diameter (mm)	1.50
Grade	25
Material	Fused silica

Description

Swiss Jewel supplies Fused Silica (Quartz) Balls from 0.30 mm to 10.00 mm. Using Spectrosil 2000 provides a low index of refraction, supports high temperature, has a good shock resistance and a light weight. Ideal material for anti-reflective coating.

NOT SEEING EXACTLY WHAT YOU NEED?

We specialize in creating a wide range of custom optical components and custom mechanical components including a variety of shapes - from internal holes and tapers to outer flanges, angles and surface finishes. Contact us and we will consult with you to create a custom component that meets all of your specifications.
